Hyderabad, Telangana, India

OBJECTIVE

Curious and motivated B.Tech undergraduate (2028 graduate) with an interest in software development, cloud computing, and computer networks. Seeking an internship opportunity to strengthen programming skills, gain hands-on experience with real-world systems, and contribute to practical technology solutions.

EDUCATION

- **KL University** Expected 2028
B.Tech-Computer Science & Engineering Hyderabad, India
 - CGPA: 9.55
- **Sri Chaitanya Junior College** 06 2022 - 04 2024
Intermediate-MPC Hyderabad, India
 - Percentage: 94.0%
- **Sri Chaitanya Techno School** 05 2021 - 07 2022
Secondary Education-CBSE(X) Hyderabad, India
 - Percentage: 83.4%

PROJECTS

- **Digital Password-Protected Door Lock System** 2025
Technologies/Tools : Logisim
 - Developed a 4-bit password-based door locking system using combinational logic circuits for secure access control. Implemented PIN verification logic with an attempt counter to restrict unauthorized access and trigger an alert after multiple failures.
 - Utilized logic gates (AND, OR, XOR, NOT) and LED indicators to simulate real-time lock and unlock operations.
 - Enhanced understanding of combination circuit design, hardware implementation, and troubleshooting techniques.
- **Secure Enterprise Network** 2025
Technologies: Cisco Packet Tracer
 - Designed and simulated a secure enterprise network with routers, switches, and end devices. Implemented VLANs, ACLs, and firewalls to ensure network segmentation and security.
 - Configured IP addressing, DHCP, DNS, NAT, and routing protocols .
Tested network performance, reliability, and security through realistic simulation scenarios. Gained hands-on experience in network design, troubleshooting, and enterprise-level security.
- **Cloud Computing Project — Cloud Infrastructure & Web Hosting (AWS & Azure)** 2025
Technologies/Tools : Azure portal, AWS free tier account
 - Created and managed AWS Free Tier resources including EC2, S3, and DynamoDB. Deployed a static website using Amazon S3 and configured public access policies. Launched and accessed EC2 virtual machines for basic compute experiments.
 - Provisioned similar infrastructure on Microsoft Azure for comparison and learning. Gained hands-on experience with cloud services, IAM basics, and resource management.

SKILLS

- **Programming Languages:** C, Java, Python, HTML, CSS
- **Core Concepts :** Database Management Systems (DBMS), Operating Systems (OS), Object-Oriented Programming (OOP), Design and Analysis of Algorithms (DAA), Artificial Intelligence & Machine Learning (AI&ML)
- **Tools & Platforms:** AWS (EC2, S3, DynamoDB — Free Tier), Microsoft Azure (VM, Static Web Hosting), Linux (Basic), Git, GitHub, VS Code , PowerBI , Google colab , Jupyter
- **Databases:** MySQL

CERTIFICATIONS

- **Certified Microsoft AZURE - AI (900)**
- **Aviatrix (ACE) MultiCloud Network Associate**
- **Google Analytics**
- **Introduction to Cybersecurity**
- **Getting Started with Git and GitHub**
- **Introduction to Cloud Computing**
- **Frontend Development using React**
